C. Operating Instructions – iPhone & Android Phones.

Note: * In order for the Cell Phone Reminder and Car Finder function to work, the MindMobile app need to be on. It use Bluetooth Low Energy and will consume minimum battery power so it can be running on the back ground.

* Make sure the Bluetooth function is enable on your Smartphone.

* When the phone updated to the new software version or the phone has been restarted, the MindMobile App needs to be manually tapped on to activate it again.

* The current version of MindMobile Device is for the car cigarette socket with power on/off controlled by the ignition key.

1. Phone Reminder Features:

- Every time you enter the car and start the engine, the MindMobile Device will search for the paired phone. If none is detected in approximated 20 seconds, it will sound a reminder tone (ring 3 times) and turn on the Red LED (Fig. C1). If it detect the phone, it will sound a short beep and turn on the Green LED (Fig. C2).
- When the phone is nearby but not in the car, the MindMobile can detect the phone and signal 'connect', however, when the car is driven away, the MindMobile will detect the disconnection and ring up the reminder tone and flash the Red LED to alert the driver.

2. Car Finder Features:

- Every time the car is parked and the engine turned off, the MindMobile automatically sends a signal to the paired Smartphone to mark the parking location.
- When you need to find the parked car, simply open up the MindMobile app and tap "Location" to bring up the map with the marked parking location. You can follow the direction from your current location (Blue Dot) to the car parking spot (Red Dot). Fig. C3 show the view and Android phones and Fig. C4 show the view in iPhone.
- You can select Map view or Satellite view by tap on "Map" on the bottom right corner. (Fig. C5).

Parking Date and Time Stamp Features:

The MindMobile also marks down the Date and Time when the car was parked. Tap on the Red pin on the maps to check the date and time parked. Tap on the Blue dot to check the current location.
